Engineer

We build the systems **your company runs on** — and we stand behind them.

Software, data, cloud and the IT that keeps it all running — from Copenhagen, since 2025.

Software Development & IT Consulting Services

Software

Software that fits your workflow

We build applications, connect existing tools and automate repetitive work.

Explore Software →

Data

Data your team can use

We connect data sources, improve database performance and build reliable data flows.

Explore Data →

Platform

Infrastructure you can operate

We improve cloud operations, deployment and recovery, with clear responsibilities.

Advisory Brand Support

Full introduction

Cases

Selected projects, with their scope, key decisions and our role in the work.

A maritime platform with clear system boundaries

The founder's work for NextMariner separates a Next.js interface, a Go API and PostgreSQL business rules. Each layer has a defined responsibility.

2025

Read the case study

Infrastructure defined in a repository

Defined Engineer ApS host roles, service configuration and checks in Ansible. Reusable configuration keeps infrastructure decisions visible in the repository.

2026

Read the case study

A bounded event pipeline for a macOS app

Bounded event buffers, filtered subscriptions and budgeted logging in a macOS app. A recorded full test run reduced core log lines from 610,996 to 1,411.

2026

Cases Get in touch →

Begin with a focused improvement

A workflow, a data flow or a system that needs improvement can be a useful first task. We can agree its scope together.

See what it costs Get in touch →

Tell us what you are building.

No form, no funnel, no sales sequence — just one e-mail to a person who will read it.

Start the conversation

Plan the first conversation

Tell us the result you need, what is already in place and when you need it. We can use that to discuss the next step.
