Engineer

Maintained a Hugo site and improved product UI

Maintained and enhanced the legacy Hugo static-site website while contributing UI/UX improvements to the primary asset-management product.

2022 – 2024

the legacy site kept, the product improved

Situation. There was a legacy website built on Hugo — a static-site generator — running alongside the company's main product, an asset-management system. The website was the old, established thing; the product was where the real value sat.

Task. Keeping the site healthy while also improving the product's experience was the remit.

Action. The Hugo static site was maintained and enhanced — kept current and working — while UI/UX improvements and feedback fed into the primary asset-management product at the same time. Splitting attention between a legacy site and the flagship product is mostly about not letting the old thing rot while you're focused on the new one; both represent the company to someone, so both had to be kept decent.

Result. The website stayed current instead of quietly ageing, and the main product's usability improved through steady, informed refinement — the kind that comes from actually using and thinking about the thing rather than redesigning it in one big swing.

Bring this experience to your project

Use "Maintained a Hugo site and improved product UI" as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. Interfaces that load quickly, work on a phone and behave the same in every browser your customers happen to use.

Need a legacy site kept alive and improved?

Talk through your project with the engineer responsible for delivery. We agree the scope, price basis and handover in writing before work begins.

Role context: GIS Software Development Team Lead. It draws on Frontend Engineering, Full-Stack Development, Web Development and UX / UI Design. And while you are here, we are rather good at Frontend Development, Website Development & CMS and UI/UX Design & Design Systems.
