Engineer

Managed 30 successful GIS projects to delivery

Managed the execution of 30 successful GIS projects, demonstrating leadership in delivering innovative solutions across the field.

2015 – 2022

30

GIS projects delivered, start to finish

Situation. The company made its money delivering GIS projects, and there were a lot of them running at once. The company's growth rode on getting them out the door reliably — not one flagship project done brilliantly, but a steady stream of them landing on time and holding together, which only happens when the coordination across the team is actually working.

Task. The responsibility was getting that portfolio delivered — keeping scope, people and timelines lined up across all of it, and giving the team the direction to ship.

Action. Across those years, the delivery of thirty GIS projects ran through this role. In practice that meant holding the scope steady when it wanted to creep, pointing the right people at the right work, and staying close enough to each project to catch trouble while it was still small. When something was going to slip, better to know early and reshuffle than find out at the deadline. A lot of the job was just keeping the plates spinning and the client's expectations honest about what was coming and when.

Result. All thirty came in. That consistency mattered more than any single project would have — a client who's seen you deliver thirty times over doesn't worry about the thirty-first, and that reputation is a good part of why the company kept growing.

Bring this experience to your project

Use “Managed 30 successful GIS projects to delivery” as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. Anything that happens in a place — vessels, vehicles, plots, sensors — put on a map you can search, measure and share.

Have a GIS project that needs delivering?

Talk through your project with the engineer responsible for delivery. We agree the scope, price basis and handover in writing before work begins.

Role context: Project Development Manager. It draws on GIS / Geospatial, Team Leadership, Project Management, Agile & Scrum and Stakeholder & Reporting. And while you are here, we are rather good at GIS & Geospatial Solutions, Team Building & Mentoring and Project Management (Agile).
