Engineer

Saved 150 hours a month across 30 projects

Enhanced project efficiency, saving 150 hours per month across 30 projects by optimizing workflows and resource management.

2015 – 2022

150

hours saved a month, across thirty projects

Situation. Across a portfolio of around thirty projects, time was being lost every single month to workflows that had never been optimised and resource management that was uneven — some people underused, some overloaded, work planned differently from one project to the next.

Task. The aim was to make the portfolio more efficient and recover the time that was going missing month after month.

Action. Going through the thirty projects, the workflows and the resource management got worked on together — taking out the bottlenecks, balancing the workloads so the same few people weren't always the constraint, and standardising how work got planned and run so each project wasn't its own special case. Thirty projects each losing a bit of time adds up; the fix was mostly about making the good practices consistent rather than inventing anything clever.

Result. The changes saved around 150 hours a month across the portfolio. That's a recurring monthly saving, not a one-off — thirty projects running leaner, month in and month out.

Bring this experience to your project

Use "Saved 150 hours a month across 30 projects" as a starting point for a similar challenge in your organisation. The services behind this work are available for your project. Hiring, onboarding and coaching, so the knowledge settles with your own people rather than leaving with a consultant.
